INDEX.

Aberdeen, walk from, to Castleton of Braemar, p. 269
Africa, western coast of, voyage to, 216
Air volcanoes, origin of the air of, 187
Alluvium of the Nile, age of, 188
America discovered by the Scandinavians, 192
Ararat, observations on, 255
Artesian wells, or overflowing wells, account of, 111, 157

Banff, Literary and Philosophical Institution, noticed, 401
Barberry, on the irritability of its stamina, 146
Baza, basin of, in Spain, described by Colonel Silvertop, 336
Bialowieza, forest of, described, 287
Biblical geography, contributions to, 255
Black-lead mine in Glen-Farrer, account of, 266
Blackpots clay, near Banff, noticed, 382
Botany of India, observations on, 123
Braemar, account of, 274
Brewsterite, notice in regard to, 185
Brincken, Baron von, memoir of the imperial forest of Bialowieza, 287
Brown, Robert, notice in regard to his observations on moving particles, 184
Bostock, Dr, improvements in black writing ink, 231
Buch, Baron von, on the subtropical zone, 129
Bursts of subterranean waters, account of, 281

Callader, Glen, geognosy of, 277
Campsie, Linn of, its geognosy, 286
Candole, De, on the botany of India, 123
Cannibals, account of, in New Guinea, 390
Castleton, geognosy of, 274
Caves, observations on, by Dr Hibbert, 149
Celestial phenomena, from July 1. to Oct. 1. 1830, 178—from Oct 1. 1830, to Jan. 1. 1831, 371
Changes of temperature in plants, 140
Christison, Professor, on the vegetable milk of the hya-hya tree, 31. —notice of his work on medical jurisprudence, 197
Chronological series of changes on coasts, 147
Clark on climate, noticed, 197
Clavering, Captain, his voyage to Greenland, 1
Coal, vast quantity of, consumed in Wales, 394
Clyde, river, quantity of water in, 184

XUM

Coldstream, Dr, his additions to the natural history of British animals, 234
Contributions to biblical geography, 255
Colour of water, 183
—— of fishes, 327
—— of ice, 183
Cunoniaceæ, a family of plants, described by David Don, 84
Cuvier, Baron, his lectures on the history of the natural Sciences, from the Ionian School to Theophrastus, 41-76.—his biographical memoir of Claude Louis Richard, 201

Davy, Sir H., his opinion in regard to volcanic phenomena considered, 136
Diluvial furrows, notice of, 186
Diluvium, origin of, 187
Don, David, monograph of the family of plants called Cunoniaceæ, 84

Eruptions of gas, 377
——— of water, 376
Experiments, important ones, in regard to steam carriages, notice of, 194
Ehrenberg and Hemprich's Travels in Egypt, noticed, 143

Fœtus of vertebrated animals, development of their vascular system described, 295
Fishes, on the changes of colour in, 327
Flood in the Highlands described, 283
Floras, fossil, remarks on, 380
Fraxinus excelsior, a native of Scotland, 189
Forest of Bialowieza, account of, 287
Foundling Hospitals, remarks on, 191

Gas, natural, village lighted by, 185
Geographical Society of London, account of, 152
Geology, new work on, 187
Geological Society of France, notice of, 156
Gerard, M. his journey to the Himala Mountains, 391
Gihon River, notice of, 261
Glen-Callader, geognosy of, 277
—— Farrer, geognosy of, 266
Graham, Dr, his description of new and rare plants, 170, 366—enumeration of plants collected by him in the Highlands, 360
Graphite mine described, 266

Hail-storms, phenomena and causes of, by Professor Olmsted, 244
Hancock, Dr, his observations on the fascination of serpents, 165
Hansteen, Professor, his journey to Siberia, 182
Herring, curing of, its discovery, 395

Hibbert, Dr, on caves, 149
Hoffmann, on valleys of elevation, 349
Horses, power of, illustrated by experiments, 385
Humboldt's new journey, 187—discourse delivered at an extraordinary meeting of the Imperial Academy of Sciences, 97
Hydrographical notices, 183

Ice, colour of, 183
Inchkeith, thunder storm at, 374
Ink, black writing, observations on, 231
Iron, enormous quantity of, raised in Wales, 394
Innes's account of celestial phenomena, 178, 371

Jerusalem, observations on, 265
Journal of a voyage to Spitzbergen and Greenland, 1
— of a voyage to the western coast of Africa, 216

Leonhard, Professor, his new arrangement of rocks, 355
Lion's-head, in Braemar, account of, 275
Luminous bodies observed attached to the vane-staff, mast-head, and yard-arm of a ship, 214
Lyell, his work on geology, noticed, 399

Macgillivray, William, account of a new species of Salix, 235—of a new species of Aira, 362
Memoirs of the Society of Strasburg, noticed, 188
Metals, polishing of, described, 241
Meteorology, notices in regard to, 182, 374
Milne, Lieutenant Alexander, account of luminous appearances on ship-board, 214
Milk, observations on its adulteration, 134
Mortality among leeches during storms, 188.

Natural History Society of Newcastle, Transactions of, noticed, 396
Nervous system of the crustacea described, 332
Norwegians, character of, 390

Patents, English, 198, 403
—— Scottish, 200, 405
Pearls, artificial, account of, 230
Petrifactions, or fossil organic remains, works on, noticed, 187.
Pison River, account of, 260
Plants, new and rare, raised in the Royal Botanic Garden, described by Dr Graham, 170, 366
Plants, temperature of, considered, 140
Polishing metals, account of, 241
Publications, new, account of, 197, 396

XUM

Raumer, his observations on Ararat, Pison, and Jerusalem, 255
Reid's Practical Chemistry, noticed, 198
Religious toleration in Russia, observations on, 190
Richard, C. L., biographical memoir of, 201

Sea, phosphorescence of, in the Gulf of St Laurence, described, 388
Seamen's health, observations on the preservation of, 216
Serpents, on the fascination of, 165
Silvertop, Colonel, his account of the basin of Baza in Spain, 336
Scottish publishing Societies, 192
Snake called Yellow-tail, described, 165
Sounds on Peak of Teneriff, account of, 374
South African Quarterly Journal, account of, 400
Springs, observations on, 111, 157
Spirit of wine, its freezing point, 184
Spittal of Glenshee, notice of, 285
Stark, James, on the colour of fishes, 327
Statistical Societies of France, notice of, 157
Stereotype printing, invention of, 193
Stomach, best character for distinguishing animals from vegetables, 384.
Subterranean water, burst of, 281
Sub-tropical zone, account of, 129
Sugar, annual quantity consumed in Britain, 191

Teignmouth, Dawlish, and Torquay Guide, by Turton and Kingston, noticed, 198
Temperature of plants, observations on, 140
Thomson, Dr Allen, his investigations in regard to the vascular system in the fœtus of vertebrated animals, 295
— Dr Thomas, his Outline of the sciences of Heat and Electricity, 197
Trees, fossil, in an erect position, observations on, 378

Water, colour of, 183
Water, motions in, produced during the respiration of animals, account of, 382
Wells, Artesian, account of, 111, 157
Wernerian Society, proceedings of, 181
Writing ink, black, observations on, 231

Valleys of elevation, observations on, 349
Vertebrated animals, the fœtus of, considered by Dr Allen Thomson, 295
Village, subterranean one in Spain, account of, 343, 349

ART. I. Journal of a Voyage to Spitzbergen and the East Coast of Greenland, in his Majesty's Ship Griper. By DOUGLAS CHARLES CLAVERING, Esq. F.R.S., Commander. Communicated by JAMES SMITH, Esq. of Jordanhill, F.R.S.E. With a Chart of the Discoveries of Captains CLAVERING and SCORESBY, 1

I. Voyage from the Thames to Hammerfest in Norway, - - - - - 3

II. From Hammerfest to Spitzbergen, - - 9

III. Unsuccessful attempt to reach from Spitzbergen a high Northern Latitude, - - - 12

IV. From Spitzbergen to the East Coast of Old Greenland—Exploration from Cape Parry to Roseneath Inlet—Meeting with the Natives—Account of them—Finally quit the Coast, and return to England, 14

II. Analysis of the Vegetable Milk of the Hya-hya Tree of Demerara. By ROBERT CHRISTISON, M.D. Professor of Medical Jurisprudence in the University of Edinburgh. Communicated by the Author, 31

III. On the Physiognomy of the Vegetable Kingdom in the Brazils. By Dr C. F. PHIL. VON MARTIUS, Knight of the Bavarian Order of Merit, &c. - 35

IV. Lectures on the History of the Natural Sciences. By Baron CUVIER, - - - - - 41

Lecture IV. Greece,—concluded from p. 349. of former Volume, - - - - - ib.

Lecture V. Schools of Philosophy before Socrates, 42

Lecture VI. Socrates and his Epoch—State of the Sciences up to the time of Aristotle, - 49

Lecture VIII. Aristotle's History of Animals, - 66

Lecture IX. Theophrastus, - - - 76

505.7
164907

Art. V. A Monograph of the Family of Plants called Cunoniaceæ. By Mr David Don, Librarian to the Linnean Society; Member of the Imperial Academy Naturæ Curiosorum; of the Royal Botanical Society of Ratisbon; and of the Wernerian Society of Edinburgh, &c. Communicated by the Author, 84

VI. Discourse delivered by Baron Alexander Humboldt at the Extraordinary Meeting of the Imperial Academy of Sciences at St Petersburg, held on the 28th November 1829, - - 97

VII. On Artesian or Overflowing Wells, - - 111

VIII. On the Botany of India, and the Facilities afforded for its investigation by the Hon. East India Company. By M. De Candolle, - - 123

IX. On the Subtropical Zone. By Baron Leopold Von Buch, - - - - - 129

X. On Milk, and its Adulteration in Paris, - 134

XI. Remarks on Sir Humphrey Davy's Opinions respecting Volcanic Phenomena. By Mr W. J. Girardin, - - - - - 136

XII. On Changes of Temperature in Plants, - 140

XIII. Naturgeshichtliche Reisen durch Nord Africa, &c. Natural History Travels in Northern Africa and Western Asia, from 1820 to 1825; by Drs Hemprich and Ehrenberg. Historical part, with Maps and Views, - - - 143

XIV. On the Irritability of the Stamina of the Barberry, 146

XV. Chronological Series of the more important Changes made upon the Coasts by the Sea, from the Eighth Century to the present day, - - 147

XVI. Notice of a Memoir read by Dr Hibbert to the Scottish Society of Antiquaries, on the Caves occupied by the early Inhabitants of the West of Europe; with illustrations of some still remaining in France and Italy, - - - - 149

XVII. New Societies,—

1. Geographical Society of London, - - 152
2. Geological Society of France, - - 156
3. Statistical Societies in France, - - 157

XVIII. Observations on the Cause of the Spouting of Overflowing Wells or Artesian Fountains, - ib

ART. XIX. Observations on the Snake called Yellow Tail (Coluber flavicolis, Linn., belonging to the division of Cerberus of Cuvier), and on the supposed power of Fascination in Serpents. By Dr J. HANCOCK, Corresponding Member of the Zoological Society, and of the Society of Arts of Scotland, &c. Communicated by the Author, 165

XX. Description of several New or Rare Plants which have lately flowered in the neighbourhood of Edinburgh, and chiefly in the Royal Botanic Garden. By Dr GRAHAM, Professor of Botany in the University of Edinburgh, - 170

XXI. Celestial Phenomena from July 1. to October 1. 1830, calculated for the Meridian of Edinburgh, Mean Time. By Mr GEORGE INNES, Astronomical Calculator, Aberdeen, - - 178

XXII. Proceedings of the Wernerian Natural History Society, - - - - 181

XXIII. SCIENTIFIC INTELLIGENCE, - 182

METEOROLOGY.

1. Professor Hansteen's Journey to Siberia, - - ib.

HYDROGRAPHY.

2. Colour of Water and Ice. 3. Quantity of Water in the River Clyde, - - - - - 183–4

CHEMISTRY.

4. Freezing point of Spirits of Wine. 5. Note on Robert Brown's Microscopical Observations on the Particles of Bodies. 6. Brewsterite, - - - 184–5

GEOLOGY.

7. A Village Lighted by Natural Gas. 8. Diluvial Furrows and Scratches. 9. Origin of the Air in Air-Volcanoes. 10. Origin of Diluvium. 11. Overflowing or Spouting Springs. 12. New Work on Geology. 13. Humboldt's New Journey. 14. Works on Petrifactions. 15. Memoirs of the Society of Strasburg. 16. On the Alluvium of the Nile, - - - - - 185–8

XUM

BOTANY.

18. Notice respecting the existence of Fraxinus excelsior, as an Indigenous Tree in Scotland, - - - 189

STATISTICS.

19. Religious Toleration in Russia. 20. Annnal Quantity of Sugar consumed in Britain. 21. Foundling Hospitals. 22. Scottish Societies. 23. Early Discovery of America by the Scandinavians. - - - 189–192

ARTS.

24. Invention of Stereotyping. 25. Important Experiments, 193–4

NEW PUBLICATIONS.

1. An Outline of the Sciences of Heat and Electricity. By Dr Thomson, Regius Professor of Chemistry, Glasgow, &c. - - - - - - - 197
2. A Treatise on Poisons in relation to Medical Jurisprudence, Physiology, and the Practice of Medicine. By Robert Christison, M. D. Professor of Medical Jurisprudence in the University of Edinburgh, &c. - - ib.
3. The Influence of Climate in the Prevention and Cure of Chronic Diseases, &c.; comprising an account of the principal places resorted to by Invalids in England, the South of Europe, &c. By James Clark, M. D. &c. - ib.
4. The Teignmouth, Dawlish, andTorquay Guide. By N. T. Carrington. The Natural History by W. Turton, M. D. and J. F. Kingston, - - - 198
5. Elements of Practical Chemistry. By David Boswell Reid, Chemical Assistant to Dr Hope, - - ib.

Art. XXIV. List of Patents granted in England, from 29th November 1829 to 6th February 1830, ib.

XXV. List of Patents granted in Scotland from 16th March to 14th June 1830, - - 200

CONTENTS.

Page

Art. I. Biographical Memoir of M. Claud Louis Richard. By Baron Cuvier, - - - 201

II. Description of Luminous Bodies which were observed attached to the Vane-staff, at the Mast-head and Yard-arm of H. M. S. Cadmus, while cruizing in the River Plate. By Lieutenant Alexander Milne, R. N. Communicated by the Author, - 214

III. Private Journal of a Voyage to the Western Coast of Africa, including Observations on the Preservation of the Health on that Station. Communicated by the Author, - - - - 216

IV. On making Artificial Pearls, - - - 230

V. On Improvements in Black Writing Ink. By John Bostock, M. D. F. R. S. E. - - 231

VI. Additions to the Natural History of British Animals. By John Coldstream, M. D. M. W. S. &c. Communicated by the Author, - - - 234

VII. On Polishing Metals, - - - - 241

VIII. On the Phenomena and Causes of Hail-storms. By Denison Olmsted, Professor of Mathematics and Natural Philosophy in Yale College, - 244

IX. Ararat, Pison, and Jerusalem, a contribution to Biblical Geography. By Charles Von Raumer, 255

X. 1. Visit to the Graphite or Black Lead-Mine in Glen Farrer in Inverness-shire. 2. Walk from Aberdeen to Castleton of Braemar.—Country around Castleton.—From Castleton to Spittal of Glen Shee, and Blairgowrie. 3. Blairgowrie,—Craighall,—Forneth,—Linn of Campsie,—Perth, - - 266

Art. XI. Descriptive Memoir of the Imperial Forest of Bialowieza. By the Baron De Brinken, Conservator in Chief, - - - - 287

XII. On the Development of the Vascular System in the Fœtus of Vertebrated Animals. By Allen Thomson, M. D. late President of the Royal Medical Society. Communicated by the Author, 295

XIII. On Changes observed in the Colour of Fishes. By Mr James Stark. Communicated by the Author, - - - - - 327

XIV. Notice in regard to the Actinia maculata, - 332

XV. On the Nervous System of the Crustacea. By MM. V. Audouin and Milne Edwards, - ib.

XVI. Description of a new species of Salix found in Braemar. By Mr W. Macgillivray, A. M. Communicated by the Author, - - 335

XVII. On the Lacustrine Basins of Baza and Alhama, in the Province of Grenada in Spain. By Colonel Charles Silvertop. Communicated by the Author, - - - - - 336

XVIII. On Valleys of Elevation, and their connection with the Origin of Acidulous Springs. By M. Frederick Hoffmann, - - - 349

XIX. Arrangement of Rocks. By Dr K. C. Von Leonhard. Communicated by the Author, - 355

XX. On the Geological Relations of the South of Ireland. By Thomas Weaver, Esq. F. R. S. &c. - 356

XXI. Notice of Plants observed in an Excursion made by Dr Graham with part of his Botanical pupils, accompanied by a few Friends, in August last, 360

XXII. Description of a Species of Aira found on Loch-nagar, in Aberdeenshire. By Mr W. Macgillivray, - - - - - 363

XXIII. Description of several New or Rare Plants which have lately flowered in the neighbourhood of Edinburgh, and chiefly in the Royal Botanic Garden. By Dr Graham, Professor of Botany in the University of Edinburgh, - - - 366

XXIV. Celestial Phenomena from October 1. 1830 to January 1. 1831, calculated for the Meridian of Edinburgh, Mean Time. By Mr George Innes, Astronomical Calculator, Aberdeen, - - 371

XUM

ART. XXV. SCIENTIFIC INTELLIGENCE, - - 374

METEOROLOGY.

1. Thunder-Storm at Inchkeith. 2. On Sounds on the Peak of Teneriffe. 3. Magnetizing Power of the Solar Rays. 4. Radiation from Trees, - - - 374–376

GEOLOGY.

5. Eruptions of Water. 6. Eruptions of Gas. 7. Fossil Trees in an erect position. 8. Crustacites and Cidarites in Mountain Limestone. 9. Connexion of Diseases with the Rock Formations of a Country. 10. Coprolite found in the Tyrol. 11. Fossil Fox. 12. Fossil Floras. 13. Boué on the relative Age of the Secondary Deposites in the Alps and Carpathians. 14. Journal de Geologie, par MM. A. Boué, Jobert, et Rozet. 15. Flint in Scotland. 16. Blackpots Clay, near Banff, - - 376–382

MINERALOGY.

17. Prunnerite. 18. Pinguite, - - - 382

ZOOLOGY.

19. Motions in Water occasioned by the process of Respiration in Animals. 20. Migration of the Common Cockle (Cardium edule) and Donax anatinum. 21. Nerita glaucina. 22. Proof that the Stomach is still the best Distinctive Character of Animals from Vegetables. 23. On the Power of Horses; by B. Bevan, Esq. 24. Fertility of the Unio Pictorum. 25. Traditional Story regarding the last of the Wolves in Morayshire. 26. The Lacerta agilis ovo-viviparous in Scotland. 27. Phosphorescence of the Sea in the Gulf of St Lawrence, - 382–388

ANTHROPOLOGY.

28. The Norwegians. 29. Natives of New Guinea are Cannibals, - - - - - 389–90

GEOGRAPHY.

30. M. Gerard's Journey in the Himala Range, - 391

ARTS.

31. Enormous quantity of Iron manufactured, and of Coal consumed in Wales. 32. Importance of the Discovery of the Curing of Herrings. 33. On the setting of Plaster; by M. Gay Lussac, - - - - 394, 395

STATISTICS.

34. German Universities, - - - - 396

NEW PUBLICATIONS.

1. Transactions of the Natural History Society of Northumberland, Durham, and Newcastle-upon-Tyne. Vol. I. Part I. 4to, pp. 130. With Eleven Plates, - - 396
2. Principles of Geology; being an Attempt to explain the former Changes of the Earth's Surface, in reference to Causes now in Operation. By CHARLES LYELL, Esq. F. R. S., Foreign Secretary to the Geological Society of London, &c. Vol. I. pp. 511, - - - - 399
3. The South African Quarterly Philosophical Journal. No. 1. from October 1829 to January 1830; and No. II. from January to April 1830. Cape Town, - - 400
